

NSPG News Update, August 2018

We are currently posting our 2017 Audited Financial Statements on our web site at <http://www.northshorepowergroup.com/bodinfo/>

We are pleased to highlight:

1. A growth in retained cash from \$1,194,931 to \$2,446,920. In conjunction with our steadily improving cash position, we have created a formal policy of allocating our defined surplus cash into a Balloon Reserve in order to plan for our long term obligations, in particular those due in 2037.
2. Net earnings of \$569,934, up from \$474,471 in the prior year. This included interest income of \$837,328 from Plasco Conversion Technologies. Plasco remains current and in good standing on its loan from NSPG, and we were instrumental in rescuing the core assets and getting the company re-launched with management.

NSPG Management is proud of the continuing positive trend in the audited NSPG financial results.

With new projects now constructed and complete in 2018, additional new revenue streams are coming on-line that will appear in future financial statements.

The future looks brighter.
