INDEPENDENT AUDITORS' REPORT

To the Shareholder and Board of Directors of North Shore Power Group Inc.

Opinion

We have audited the financial statements of North Shore Power Group Inc. (the "Company"), which comprise:

- the statement of financial position as at December 31, 2020
- the statement of income and comprehensive income for the year then ended
- the statement of changes in shareholder deficit for the year then ended
- the statement of cash flows for the year then ended
- and notes and schedules to the financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2020, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "**Auditors' Responsibilities for the Audit of the Financial Statements**" section of our auditors' report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 2 in the financial statements, which indicates that the Company was affected by significant events occurring in 2015 as well as ongoing uncertainty with respect to the receipt of annual interest payments casting doubt on the Company's ability to satisfy current interest payments and long-term debt repayments. These events or conditions, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern.

Our opinion is not modified in respect of this matter.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

Page 3

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

1. Nature of operations:

North Shore Power Group Inc. (the "Company" or "NSPGI") was incorporated on July 18, 2007 under the Ontario Business Corporations Act pursuant to section 142(1) of the Electricity Act, 1998 (Ontario). The Company undertakes economic development processes and projects to enhance the availability and financing of alternative energy sources in the province of Ontario.

The Company's head office is located at 80 Development Drive, Blind River, Ontario, Canada. The Company is wholly owned by its parent organization, The Corporation of the Town of Blind River (the "Town" or the "shareholder").

2. Going concern:

These financial statements have been prepared on a going concern basis, which assumes, among other things, that the company will be able to make the required payments under the terms of its long-term debt as they become due.

In early 2015, one of the Company's customers encountered financial difficulties resulting in the impairment of a significant asset of the Company and, as a result, management anticipates that the Company's liabilities may continue to significantly exceed its assets in future years. The portion of the Company's long-term debt held by its shareholder, The Corporation of the Town of Blind River, has been renegotiated to defer a significant portion of the required payments, on an interest-free basis, until the maturity date of the loan in 2037 (note 11). The Company's customer has continued to experience financial difficulties and as a result there is uncertainty with respect to the ongoing annual interest payments to be received and the ability for the Company to satisfy their long-term debt repayments to the Town of Blind River.

Management expects the Company will have adequate financial resources to service the repayable portion of the long-term debt on an annual basis, however, there remains uncertainty regarding the Company's ability to discharge the deferred portion of the long-term debt upon its maturity in 2037 if the promissory note receivable from Plasco Energy Group Inc. is not collected in accordance with its stated terms and conditions (note 5).

The accompanying financial statements do not include any adjustments relating to the recoverability of assets and to the reclassification of asset and liability amounts that might be necessary should the company be unable to continue its operations.

3. Significant accounting policies:

The accounting policies set out below have been applied consistently in all years presented in these financial statements.

(a) Statement of compliance:

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (the IASB).

(b) Basis of measurement:

These financial statements were prepared using the historical cost basis of measurement.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(c) Functional and presentation currency:

The Company's functional and presentation currency is the Canadian dollar.

(d) Use of estimates and judgments:

(i) Assumptions and estimation uncertainty

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and liabilities. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in material adjustment is included in the following notes:

Note 13 – Measurement of leases: discount rate

Note 9 – Property and equipment

Note 12 – Asset retirement obligations

Note 15 – Commitments and contingencies

(ii) Judgments

Information about judgments made in applying accounting policies that have the most significant effects on the amounts recognized in the financial statements is included in the following note:

Notes 13 – leases: whether an arrangement contains a lease

Notes 13 – leases: lease term, underlying leased asset value

(e) Cash:

Cash is defined as cash on hand, deposits with banks and other highly liquid investments with terms to maturity of ninety days or less at the date of purchase.

(f) Revenue recognition:

Solar power generation revenue is recognized on an accrual basis based on the amount of electricity generated during the period at rates stipulated in the power purchase contract with the Ontario Power Authority (OPA). Solar power generation equipment leasing revenue is recognized on an accrual basis at the appropriate percentage, stipulated in the lease agreement, of electricity revenue generated by the leased equipment during the period at rates stipulated in the power purchase contract between the lessee and the Ontario Power Authority (OPA).

Finance lease revenue is recognized on accrual basis using the amortized cost method using the interest rate implicit in the lease agreement signed by the lessee.

Photovoltaic systems design and build revenue is recognized on an accrual basis as allowed for under the terms of the construction contracts.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(f) Revenue recognition (continued):

Other revenue including land lease and operations and maintenance contract revenue is recognized in the period that these services are provided.

(g) Leased assets:

At inception of a contract, the Company assess whether the contract is or contains a lease. A contract is determined to contain a lease if it provides the Company with the right to control the use of an identified asset for a period of time in exchange for consideration. Contracts determined to contain a lease are accounted for as leases. For leases and contracts that contain a lease, the Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Subsequent to initial recognition, the right-of-use asset is recognized at cost less any accumulated depreciation and any accumulated impairment losses, adjusted for certain remeasurements of the corresponding lease liability.

The lease liability is initially measured at the present value of lease payments plus the present value of lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate.

The lease liability is subsequently measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company has elected not to recognize right-of-use assets and lease liabilities for leases that have a lease term of 12 months or less or for leases of low value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(h) Solar power generation equipment held for leasing purposes:

Solar power generation equipment held for leasing purposes are recorded at cost less accumulated depreciation and impairment charges. The Company provides for depreciation using the straight line method over 20 years, being their estimated useful lives, from the day the asset is put into revenue generating production.

(i) Property and equipment:

Property and equipment are stated at cost less accumulated amortization and impairment losses. Cost includes expenditures that are directly attributable to the acquisition or construction of the asset when those costs are necessarily incurred for the asset to function in the manner intended by management and the net costs of dismantling and removing the leased items and restoring the site on which they are located. When parts of an item of property and equipment have different useful lives, they are accounted for as separate items of property and equipment.

All assets having limited useful lives are depreciated using the straight-line or declining balance method over their estimated useful lives. In the year of acquisition, assets depreciated on a straight line basis are depreciated from the day the asset is put into revenue generating production and assets depreciated using the declining balance basis are depreciated at one half of the annual rate. Assets under development are not amortized until they are put in use.

The methods of amortization and amortization rates applicable for each class of asset are as follows:

Vehicles and moveable equipment	30% declining balance
Furniture and equipment	20% declining balance
Leasehold improvements	3 years straight-line
Computer hardware	30% declining balance
Installation and maintenance equipment	5 years straight-line balance
Monitoring system	20% declining balance
Industrial park	20 years straight-line
Dam and wind turbine	20 years straight-line
Solar power generation equipment	20 years straight-line

The golf course pilot project is in construction and has not yet been put in use. Amortization will commence when the assets are put in use.

The cost of replacing a component of property and equipment is capitalized if it is probable that future economic benefits embodied within the component will flow to the Company. The carrying amount of the replaced component is derecognized.

Costs of routine maintenance and repair are expensed in the period they are incurred.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(j) Impairment:

(i) Financial assets measured at amortized cost:

A loss allowance for expected credit losses on financial assets measured at amortized cost is recognized at the reporting date. The loss allowance is measured at an amount equal to the lifetime expected credit losses for that asset.

(ii) Non-financial assets:

Non-financial assets are subject to impairment tests whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less cost to sell, the asset is written down accordingly.

For the purpose of determining value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

When it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash flows. Impairment charges are included in operations.

(k) Financial instruments:

All financial assets and all financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequently, they are measured at amortized cost using the effective interest method less any impairment for the financial assets as described in note 3 (j).

Hedge accounting has not been used in the preparation of these financial statements.

(l) Provision for asset retirement obligations:

A legal or constructive obligation to incur restoration and asset retirement costs arises when disturbance is caused by the construction of solar panels on a homeowner's property or other lands ongoing. A provision for management's best estimate of the future costs required for the retirement of these solar panels is recognized and capitalized to the carrying amount of the corresponding asset, as soon as the obligation to incur such costs arises. The provision is discounted to its present value using a risk-free rate of return. The unwinding of the discount is recognized each period as a finance cost. These costs are charged within income or loss over the economic life of the related assets through amortization over the assets useful life. The provision is adjusted each period for changes in the amount or timing of the estimated future cash flows and changes in the discount rate. These changes are recognized as an additional to or reduction from the corresponding asset.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(m) Foreign currency transactions:

At the transaction date, each asset, liability, revenue and expense denominated in a foreign currency is translated into Canadian dollars by the using the exchange rate in effect at that date.

At the year-end date, unsettled monetary assets and liabilities are translated into Canadian dollars by using the exchange rate in effect at the year-end date and the related translation differences are recognized in operations. Exchange rate gains and losses arising on the retranslation of monetary financial assets are treated as a separate component of the change in fair value and recognized in operations. Exchange gains and losses on non-monetary financial assets form part of the overall gain or loss recognized in respect of that financial asset.

Non-monetary assets and liabilities that are measured at historical cost are translated into Canadian dollars by using the exchange rate in effect at the date of the initial transaction and are not subsequently restated.

(n) Income taxes

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in OCI.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. Deferred tax is measured at the tax rates expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

3. Significant accounting policies (continued):

(o) Investment in limited partnership:

Limited partnerships are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity.

Limited partnerships are accounted for using the equity method and are recognized initially at cost. The financial statements includes the Corporation's share of the income and expenses and equity movements of the limited partnership, after adjustments to align the accounting policies with those of the Company and other adjustments arising from the elimination of intercompany transactions, from the date that significant influence commences until the date that significant influence ceases. When the Company's share of losses exceed its interest in a limited partnership, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

4. Solar power generation equipment held for future projects:

Solar power generation equipment held for future projects are recorded at cost and consisting of spare parts and solar power generation equipment held for the construction of future, long-term solar power generation project assets and accordingly has been classified as a non-current assets in these financial statements.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

5. Promissory note receivable:

	2020	2019
Promissory note receivable from Plasco Energy Group Inc., bearing interest at 4.0% per annum, repayable interest only beginning December 31, 2016 and each December thereafter, maturing December 31, 2026 at which time all principal and accrued interest is due, secured by a general security agreement	\$ 19,545,373	\$ 19,545,373
Allowance for impairment	(19,545,372)	(19,545,372)
	\$ 1	\$ 1

This principal amount of the promissory note has been recognized in the statement of financial position at its estimated recoverable amount.

During the current year, interest in the amount of \$1,173,849 was accrued in accounts receivable from Plasco Energy Group Inc. on the promissory note receivable as payment was received in partial payments in March, 2020 and April 2020.

The terms of the note receivable agreement, amended on February 22, 2017, includes a provision requiring payment of a principal bonus of 1% per month for each month the promissory note receivable is outstanding which is due as of the date of payout of the promissory note receivable. As of December 31, 2020, the amount of the principal bonus is \$12,313,585 which is not reflected in these financial statements as a result of the uncertainty in the collectability of the note receivable.

On January 1, 2021 Plasco Energy Group Inc. changed their name to OMNI Conversion Technologies Inc. There were no changes in the terms of the promissory note agreement at this time.

6. Mortgages receivable:

	2020	2019
Vigor Clean Tech Inc. mortgages receivable in blended semi-annual payments of \$45,000, calculated with interest at 4.03% per annum using the effective interest rate method, maturing September 2036. The undiscounted balance receivable on these mortgages is \$1,440,000 (2019 - \$1,530,000)	\$ 1,053,777	\$ 1,099,911
Less current portion	48,012	46,134
	\$ 1,005,765	\$ 1,053,777

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

6. Mortgages receivable (continued):

Estimated principal amounts to be received are as follows:

2021	\$	48,012
2022		49,966
2023		52,000
2024		54,117
2025		56,320
Thereafter		793,362
	\$	1,053,777

7. Investment in Limited Partnership:

The Company contributed cash and assets totaling \$1,326,000 to the Saturn Solar 5 Limited Partnership (SS5LP), a limited partnership formed under the Limited Partnerships Act (Ontario) on April 19, 2016. The limited partnership is managed by Saturn Power Inc. (a 49% limited partner) pursuant to an administrative services agreement. The operations and its solar power generation facilities are maintained by North Shore Power Group Inc. (a 51% limited partner) pursuant to an operations and maintenance agreement. The limited partnership's primary business activity is the development, operation and leasing of solar power generation facilities located in the Town of Blind River.

Investment in SS5LP	2020	2019
Balance, beginning of year	\$ 1,265,332	\$ 1,369,764
Share of earnings	56,356	23,068
Less 51% of cash distributions received	–	(127,500)
Balance, end of year	\$ 1,321,688	\$ 1,265,332

Condensed supplementary financial information on SS5LP is as follows:

	2020	2019
Current assets	\$ 807,882	\$ 597,460
Capital assets	9,173,220	9,553,967
Current liabilities	(491,545)	(459,332)
Long-term debt	(6,898,013)	(7,211,052)
Partner's capital	\$ 2,591,544	\$ 2,481,043
Revenue	\$ 1,109,368	\$ 1,073,387
Expenses	(998,866)	(1,028,155)
Net income	\$ 110,502	\$ 45,232

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

7. Investment in Limited Partnership (continued):

The Company has entered into a lease agreement with SS5LP to lease solar power generation equipment from SS5LP which is installed on sites for which the Company has solar power contracts with Hydro One Networks Inc. The lease fees paid by the Company are equal to 100% of the solar power generation revenue received by the Company from these solar power contracts. The lease fees over the next 5 years cannot be estimated as they are calculated based on the solar power generation revenue from the site which is variable.

8. Solar power generation equipment held for leasing purposes:

Beginning in 2010, the Company entered into contracts to install ground and roof mounted solar panels at various sites within the province of Ontario. The Company leases the equipment to the property owner (the lessee) in exchange for a lease fee equal to 90% of the solar power generation revenue that is earned by the lessee. Each lease is for a 20 year term. The total solar power generation equipment under lease is as follows:

	Cost	Accumulated Depreciation	Net Book Value
January 1, 2019	\$ 9,180,615	\$ (2,965,264)	\$ 6,215,351
Depreciation expense	–	(459,834)	(459,834)
Balance, at December 31, 2019	9,180,615	(3,425,098)	5,755,517
Depreciation expense	–	(459,833)	(459,833)
Balance, at December 31, 2020	\$ 9,180,615	\$ (3,884,931)	\$ 5,295,684

The Company is responsible for the repair, maintenance and monitoring of the leased equipment as well as the cost of one temporary removal of the equipment for the repair or replacement of the lessees' roof or premises. At the end of the lease, the lessees have the option to purchase the equipment for one dollar. The present value of the estimated cost to remove and dispose of the equipment for those lessees who do not wish to purchase the equipment at the end of the lease of \$186,000 is included in the cost of the equipment. The estimated cost to remove has been determined based on the cost of the replacements completed.

Since the lease payments received by the Company are contingent upon the generation revenue earned by the lessees, it is not possible to determine what the minimum lease payments will be over the next 20 year lease periods.

Notes to Financial Statements

Year ended December 31, 2020

9. Property, plant and equipment (continued):

The dam was purchased from the Town at an amount equal to the Town's carrying value of the assets. All revenues from these assets are to be paid to the Town and all expenses from these assets are to be paid by Town. The Town assumes all liabilities that may arise from these assets.

The golf course pilot project is a net metering project set up at the Huron Pines Golf Course in the Town. All revenues from this asset are to be paid to the Huron Pines Golf Course, however, when the equipment is dismantled, the equipment will return to the inventory of the Company. As the project has not yet become operational, the equipment is not being depreciated.

10. Accounts payable and accrued liabilities:

	2020	2019
Trade accounts payable and accrued liabilities	\$ 168,854	\$ 157,804

	<u>\$ 638,590</u>	<u>\$ 642,654</u>

11. Long-term debt:

	2020	2019
CWB Maximum, non-revolving term loan repayable in blended quarterly payments of \$16,851, including interest at 6.32% per annum, due March 9, 2025 and secured by specific solar power generation equipment with a net book value of \$518,408 (2019 - \$554,741)	\$ 262,213	\$ 311,099
Corporation of the Town of Blind River unsecured, non-interest bearing loan repayable in blended semi-annual payments of \$4,500, calculated with interest at 4.03% per annum using the effective interest rate method, maturity September 2036. The undiscounted balance payable on this loan is \$144,000 2019 - \$153,000)	106,919	111,595
Corporation of the Town of Blind River term loan, repayable in blended annual payments of \$1,115,324 with interest at 4.03% per annum, due April 1, 2037 (accrued interest of \$457,362 (2019 - \$474,567) included in accounts payable and accrued liabilities)	13,537,148	14,084,852
Corporation of the Town of Blind River interest-free loan, calculated with interest at 4.03% per annum using the effective interest rate method, with the principal due in one balloon payment of \$23,406,750 at maturity on April 1, 2037. Accrued interest of \$2,547,489 (2019 - \$2,068,614) has been recorded.	12,361,604	11,882,728
	<u>26,267,884</u>	<u>26,390,274</u>
Less: current portion	626,628	601,204
	<u>\$ 25,641,256</u>	<u>\$ 25,789,070</u>

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

11. Long-term debt (continued):

The Corporation of the Town of Blind River loans are secured by a general security agreement over all assets of the Company.

The classification of the loan balance between current and non-current in the statement of financial position, as well as the disclosure of principal payments required over the next five years and thereafter are as follows:

2021	\$ 626,628
2022	653,154
2023	680,831
2024	709,711
2025	705,879
Thereafter	22,891,681

Interest on long-term debt is inclusive of interest and accreted interest on long-term debt as follows:

	2020	2019
Interest on long-term debt	\$ 573,930	\$ 596,377
Accreted interest on long-term debt	478,875	460,323
	<u>\$ 1,052,805</u>	<u>\$1,056,700</u>

The agreement with the Town includes an interest rate of 0% for the balloon payment portion of the loan. An imputed interest rate of 4.03% was applied to the balloon payment portion of the loan, consistent with the annual payments portion of the loan from the Town. The resulting imputed interest is accrued on the balloon payment annually until the maturity date in 2037.

12. Asset retirement obligations:

Estimated asset retirement obligations have been provided for the eventual disassembly, removal and disposal costs of the solar power generation equipment. The present value of the estimated cost of disassembling, removing and disposing of the equipment when the solar power generation contracts have ended has been included in the cost of the asset and is depreciated over the life of the solar power generation contract which the equipment is used for.

The asset retirement obligation may change materially based on future changes in operations, and regulatory requirements.

15. Commitments and contingencies:

- a) The Company has entered into a lease agreement for office and warehouse space with the Blind River Development Corporation, a corporation wholly owned by the Company's shareholder. The annual lease payment is \$81,910 expired in March 2019 and continues month to month. The lease payments include all regular maintenance, utilities and property taxes on the premises.
- (b) The Company has entered into land leases whereby solar power generation equipment owned by the Company is installed on land owned by third parties. The land leases are for the life of the solar power generation contracts with Hydro One Networks Inc. which are for 20 years beginning in 2011. The lease fees will be \$74,400 per year.
- c) The Company has also entered into a roof lease contract whereby solar power generation equipment owned by the Company is installed on the roof of a property owned by a third party. The roof lease is for the life of the solar power generation contract with Hydro One Networks Inc. which are for 20 years. The lease fees over the next 5 years cannot be estimated as they are calculated as 7.5% of the solar power generation income from the site.

16. Deferred income taxes:

The provision for income taxes recorded in the statement of income and comprehensive income differs from the amount which would be obtained by applying the statutory income tax rate of 26.5% (2019 - 26.5%) to the earnings for the years as follows:

	2020	2019
Income (loss) for the year before income taxes	\$ 106,535	\$ (666,163)
Anticipated income tax expense (recovery)	\$ 28,232	\$ (176,533)
Tax effect of the following:		
Non-deductible items	123	125
Adjustment to prior years	(206,039)	-
Change in unrecognized temporary differences	142,937	(624,389)
Non-taxable portion of capital gain	-	(31,983)
Other	-	(5,755)
Income tax recovery	\$ (34,747)	\$ (838,535)

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

16. Deferred income taxes (continued):

The Significant components of Company's deferred income tax balances are as follows:

	2020	2019
Deferred tax assets:		
Non-capital loss carry-forwards	\$ 2,173,002	\$ 2,646,158
Fixed assets	1,743,912	1,541,085
Mortgages receivable	102,349	(100,616)
Other	613	451
	4,019,876	4,087,078
Deferred tax liability:		
Long-term debt	(2,936,790)	(3,053,866)
Investment in limited partnerships	(350,247)	(335,313)
Right of use assets	(193)	—
	(3,287,230)	(3,389,179)
Net deferred tax asset	\$ 732,646	\$ 697,899

The Company has certain temporary differences that have not been recognized as a deferred tax asset as at December 31, 2020. It was determined, that in the opinion of management, it is not probable that tax benefit will be realized in the foreseeable future.

Unrecognized deferred tax assets

	2020	2019
Non-capital tax loss carry-forwards	\$ 2,359,638	\$ 2,216,700

The company has non-capital tax losses of \$17,104,211 carried forward from prior years which can be applied to reduce future years' taxable income. These non-capital losses will expire in 2035. The portion of non-capital tax losses included in the table above have not been recognized as deferred tax assets within these financial statements. The unrecognized portion of the tax losses will be reviewed on an annual basis and the tax benefit recognized when it is determined to be probable that they will be realized.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

17. Critical accounting estimates and judgments:

The Company makes estimates and assumptions about the future that affect the reported amounts of its assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in accounting estimate is recognized prospectively by including it in operations in the period of the change, if the change affects that period only or in the period of change and future periods, if the change affects both.

The estimates and assumptions that have significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year are as follows:

(a) Income and sales taxes:

The Company periodically assesses its liabilities and contingencies related to current and deferred income taxes as well as sales taxes for all years open to audit based on the latest information available. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties. Management believes that they have adequately provided for the probable outcome of these matters, however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

(b) Amortization expense:

In the determination of amortization rates, the Company makes judgments about the useful lives of its property and equipment, in particular solar panels. Management has based these judgments on information provided by the manufacturer of the panels, historical experience and the duration of the power generation contracts with the Hydro One Networks Inc.

(c) Impairment of property and equipment:

The Company determines that its property and equipment and its investments are impaired when there has been a significant or prolonged decline in fair value below its carrying amount. The determination of what is significant or prolonged requires judgment. In making these judgments, the Company considers, among other factors, the financial health of the investee, future power generation potential and forecasted maintenance costs.

(d) Impairment of financial assets:

The Company determines that its financial assets are impaired when there is objective evidence of a decline in fair value below the carrying amount. The interpretation of the objective evidence requires judgment. In making these judgments, the Company considers, among other factors, the financial health of the investee and default or delinquency in interest or principal payments.

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

18. Related party transactions:

The Company is wholly owned by the Corporation of the Town of Blind River (the shareholder). The Company entered into the following transactions with its sole shareholder and key management personnel, which are defined by IAS 24 - Related Party Disclosures, as those persons having the authority and responsibility for planning, directing and controlling the activities of the Company, including directors and management.

Effective March 1, 2010, the shareholder entered into a \$49,500,000 loan agreement with the Company. This loan agreement was amended in early 2015 whereby the remaining loan balance was split into two components. The first component of the loan is repayable on an annual basis. The balance of the repayable portion of the loan at December 31, 2020 is \$13,537,148 (2019 - \$14,084,852). Accrued interest of \$457,362 (2019 - \$474,567) relating to this loan is included within accounts payable and accrued liabilities. The second component of the loan is without interest and requires only a single balloon payment at maturity. The balance of the interest free portion of the loan is \$12,361,604 (2019 - \$11,882,728) including accrued interest using the amortized cost method of \$2,547,489 (2019 - \$2,068,614).

During the year, the Company paid a management fee of \$180,000 (2019 - \$180,000) plus HST to a corporation related to a director of the Company for project management services provided by the corporation in the ordinary course of business. This expense is included in solar project planning and development expense shown in Schedule 2. There is no payable at year end related to these fees.

During the year, the Company rented office and warehouse space from the Blind River Development Corporation ("BRDC"), a corporation under common control. The total rent for 2020 was \$81,910 (2019 - \$81,910). A portion, \$6,727 (2019 - \$6,727), of this expense has been included in rent expense on Schedule 2: Planning and Administrative expenses. The remainder of the expense has been included in operating expenses allocated based on usage. There was no payable at year-end for rent for the year ended December 31, 2020.

At December 31, 2020, the company has accrued a payable to the shareholder of \$35,107 for insurance coverage under a cost sharing arrangement since May 23, 2018. During the year \$43,314 (2019 - \$31,393) was expensed for insurance coverage under a cost sharing arrangement. This expense is included in insurance expense in Schedule 1.

Key management personnel:

The key management personnel of the Company have been defined as members of its board of directors and executive management team members, and their compensation is summarized below.

	2020	2019
Directors' fees	\$ 6,000	\$ 6,000

NORTH SHORE POWER GROUP INC.

Notes to Financial Statements

Year ended December 31, 2020

18. Related party transactions (continued):

In 2010, the Company entered into a 20 year contract to install and lease solar power generation equipment to its shareholder. The lease agreement is identical to the lease agreements the Company has with substantially all of its other solar power generation equipment leases which stipulate a lease rate of 90% of the solar power generation revenue. The lease fees charged to its shareholder in 2020 were \$297,451 (2019 - \$297,451) and are included within equipment lease revenue.

A dam and wind turbine were purchased from the shareholder in a prior year at an amount equal to the shareholder's carrying value of the assets. All revenues from these assets are to be paid to the shareholder and all expenses from these assets are to be paid by the shareholder. The Corporation of the Town of Blind River assumes all liabilities that may arise from these assets. The company amortizes these assets on a straight line basis over 20 years. The wind turbine was dismantled in 2018 as the operational costs exceeded the revenue it was expected to generate. The net book value of the wind turbine of \$14,828 was written off in 2018 and is included in the loss on disposal of property and equipment within the Statement of income (loss) and comprehensive income (loss). The shareholder has entered into a contract with the Company for the operations and maintenance of the dam beginning in May 2018 for \$3,000 per month. The \$36,666 charged to the Town in 2020 is included in operation and maintenance contracts revenue within Schedule 1.

In 2013, the Company entered into a 20 year lease agreement with the shareholder for approximately 24.15 acres of land at the Blind River Industrial Park. The lease grants the Company the right to prepare the site for a solar generation project, the right to build or sublease the land for the building of a solar lease project, to connect the solar generation equipment installed on the land to electrical infrastructure and generate electricity from the solar generation equipment on the land. The Company has connected solar generation equipment located on the leased land to the Ontario power grid and has commenced transmitting electricity and generating revenue therefrom. The Company pays annual lease payments of \$4,058 to the shareholder and the Company is also responsible for all municipal taxes on the leased land. The term of the lease is 20 years from the date the first lease payment is due plus one year thereafter to decommission the site. In 2020, \$4,058 (2019 - \$4,058) of lease fees were paid to the Town. These lease fees are included as an operating expense on Schedule 1.

18. Related party transactions (continued):

In 2013, the Company acquired 62 acres of land (consisting of 5 lots) at the Blind River Industrial Park from the Town in exchange for 10% of the annual gross revenue derived from any energy project developed on the property. In 2016, the Company completed all conditions necessary for the sale of 3 of those lots to Vigor Clean Tech Inc. for a total of \$1,800,000. The Company will pay the Town semi-annual payments of \$4,500 over 20 years for a total of \$180,000 representing 10% of the sale proceeds. On the 2 remaining lots, the Company has obtained 20 year FIT contracts, and as a result solar power generation installations owned by Saturn Solar 5 Limited Partnership (SS5LP) have been built on each lot, and the sites began generating revenue in July 2018. The Company has 20 year contracts with SS5LP for the lease of solar generation equipment equal to 100% of the power generation revenue earned from the sites. SS5LP will lease the 2 lots from the Company for \$1,000 per year. The Company will pay 10% of the lease fee to the Town. In addition, the Company will pay 10% of its 51% share of the net income of SS5LP directly related to those 2 solar power contracts to the Town for the purchase of 2 lots. In 2020, the Company paid \$3,540 to the Town for those 2 lots based on the information in the audited financial statements of SS5LP. As the payments are based on SS5LP's net income generated from the sites, it is not possible to estimate at this time the amount of the payments to be made over the next 5 years and the total amount to be paid to the Town for those 2 lots.

On March 1, 2016, the Company entered into three 20 year lease agreements with the Town to lease 3 lots of land at the Blind River Industrial Park for 10% of the gross power sales revenue from all power generation projects built on the site. The leases grant the Company the right to prepare the site for a solar generation project, the right to build, or sublease the land for the building of, a solar lease project, to connect the solar generation equipment installed on the land to electrical infrastructure and generate electricity from the solar generation equipment on the land. As the Company connected the solar generation equipment on the leased lands to the Ontario power grid in 2017 and has commenced transmitting electricity and generating revenue therefrom, the Company began paying annual lease payments to the Town in 2017. The Company is responsible for all municipal taxes on the leased land. The term of the lease is 20 years from the date the first lease payment is due and may be extended on a monthly basis after that time. In 2020, \$63,409 (2019 - \$60,467) of lease fees were paid to the Town. These lease fees are included as an operating expense on Schedule 1. These lease fees have been offset against the solar power revenue earned on the sites.

In 2016 the Company formed the limited partnership, Saturn Solar 5 LP along with Saturn Power Inc. The partnership was formed to build and lease solar power generation facilities to the Company. The Company has a 51 % equity interest in the limited partnership. During the year, the Company earned \$31,273 (2019 - \$30,705) in operation and maintenance fees from SS5LP and paid \$1,144,438 (2019 - \$1,144,438) in solar power equipment lease fees to SS5LP which have been offset against the solar power revenue earned from the sites where the leased equipment is being used.

19. Financial instruments and risk management:

(a) Fair value disclosure:

Cash is measured at fair value. The carrying values of accounts receivables and accounts payable and accrued liabilities approximate fair value because of the short maturity of these instruments.

(b) Financial risks:

The Company understands the risks inherent in its business and defines them broadly as anything that could impact its ability to achieve its strategic objectives. The Company's exposure to a variety of risks such as credit risk, interest rate risk, and liquidity risk, as well as related mitigation strategies are discussed below.

i) Credit risk:

Financial assets carry credit risk that a counterparty will fail to discharge an obligation which could result in a financial loss. Financial assets held by the Company such as accounts receivable, mortgage receivable and the promissory note receivable, expose it to credit risk. The Company earns its revenue from customers located in the Town of Blind River. No single customer accounts for a balance in excess of 10% of total accounts receivable.

The carrying amount of accounts receivable is reduced through the use of an allowance for estimated credit losses and the amount of the related impairment loss is recognized in net income. Subsequent recoveries of receivables previously provisioned are credited to net income. There are no amounts included within the allowance for impairment at December 31, 2020 for accounts receivable. Within the promissory note receivable an impairment for the allowance for uncollectible accounts of \$19,545,372 (2019 - \$19,545,372) has been recorded.

Year ended December 31, 2020

19. Financial instruments and risk management (continued):

(b) Financial risks (continued):

i) Credit risk(continued):

The Corporation's credit risk associated with accounts receivable is primarily related to payments from customers. At December 31, 2020, within customer trade accounts receivable there are no amounts considered to be past due.

ii) Market risk:

Market risk primarily refers to the risk of loss resulting from changes in commodity prices, foreign exchange rates, and interest rates. The Company currently does not have any material commodity, foreign exchange risk or interest rate risk.

iii) Liquidity risk:

The Company monitors its liquidity risk to ensure access to sufficient funds to meet operational and investing requirements. The Company's objective is to ensure that sufficient liquidity is on hand to meet obligations as they fall due while minimizing interest exposure. The Company monitors cash balances daily to ensure that a sufficient level of liquidity is on hand to meet financial commitments as they come due.

The majority of accounts payable, as reported on the statement of financial position, are due within 30 days.

iv) Capital disclosures:

The Company's objectives with respect to capital management are to maintain a sufficient capital base to meet its obligations under its long-term debt and to maintain or increase current operating levels. A secondary objective is to accumulate additional capital to allow the Company to pursue new alternative energy development projects in its operating region. Capital, for this purpose, consists of the sum of shareholder's deficit and subordinated loans from the Company's shareholder, the Corporation of the Town of Blind River. The Company is not subject to any externally-imposed capital requirements and has not changed its objectives, policies or processes for managing capital during the current year.

Notes to Financial Statements

Year ended December 31, 2020

19. Financial instruments and risk management (continued):

(b) Financial risks (continued):

iv) Capital disclosures (continued):

The Company's definition of capital includes shareholder's deficiency and long-term debt. As at December 31, 2020, shareholder's deficiency amounts to (\$11,432,196) (2019 - (\$11,717,979)) and long-term debt amounts to \$26,576,956 (2019 - \$26,432,926).

(c) Other risks:

On March 11, 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization and has had a significant global impact with respect to financial markets. This has resulted in Governments worldwide enacting emergency measures to combat the spread of the virus. Several measures were put in place which include the implementation of travel bans, self-imposed quarantine periods and social distancing. These measures have caused material disruption to individuals, businesses, and organizations globally which has resulted in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. However, the success of these interventions is not currently determinable.

At the time of approval of these financial statements, the Company, which conducts business in communities impacted by COVID-19, has experienced the following indicators of financial implications and undertaken the following activities in relation to the COVID-19 pandemic:

- Purchase and use of personal protective equipment in all public spaces
- Compliance with all Ontario government emergency orders

These factors present uncertainty over future cash flows, may cause changes to the assets or liabilities and may have an impact on future operations. An estimate of the financial effect is not practical at this time.

20. Comparative information:

Certain comparative figures have been reclassified, where applicable, to conform to the financial statement presentation adopted in the current year. The changes do not affect prior year earnings.
